Who We Are

Evolve has in-depth expertise in medical imaging technology which helps us serve a broad range of clients from large hospitals and imaging centers to small private specialty practices. Evolve works side by side with our clients to develop and implement solutions that optimize workflow, productivity, communications, and health & safety. With a continued commitment, Evolve provides the technical knowledge and ongoing support needed for our clients to:

- Enhance existing enterprise systems
- Automate communications
- Create safer work environments
- Transition to new technologies affordably and with ease
- Increase revenue & profitability

The Technology and Commitment You Need for
Enhanced Workflow and Better Patient Care ►

How We Do It

When you become our client, Evolve becomes your true partner. We offer an unparalleled skill set that combines comprehensive medical imaging expertise with strong capabilities in communication and training. By leveraging both, we have enriched our value to our clients and enable them to trust us with their most challenging projects. Our proven experience provides fast-track results through a rich set of consultative services.

- Imaging expertise to thoroughly identify challenges and needs
- Creative and pragmatic solutions that yield higher productivity & profitability
- Installation, implementation, & training tailored to meet your schedules demands
- Ongoing support & maintenance that ensures continual peak performance

Workflow

Unique and innovative workflow solutions offered by Evolve provide healthcare professionals an optimized radiology environment. These solutions are streamlined and efficient, and are achieved through user-friendly technologies.

- Acquisition
- Distribution & Viewing
- Reporting
- Dicom Utilities
- Tele-Radiology
- Displays (Clinical)

DICOM Utilities

Evolve's DICOM utility solutions automates the handling of outside studies and standardizes viewing, while dramatically reducing the demands on Radiology IT. These easy to use, robust, and affordable solutions work with multiple platforms and applications.

- Stand alone utility workstations
- Network based solutions
- Cloud solutions

Medical Practices

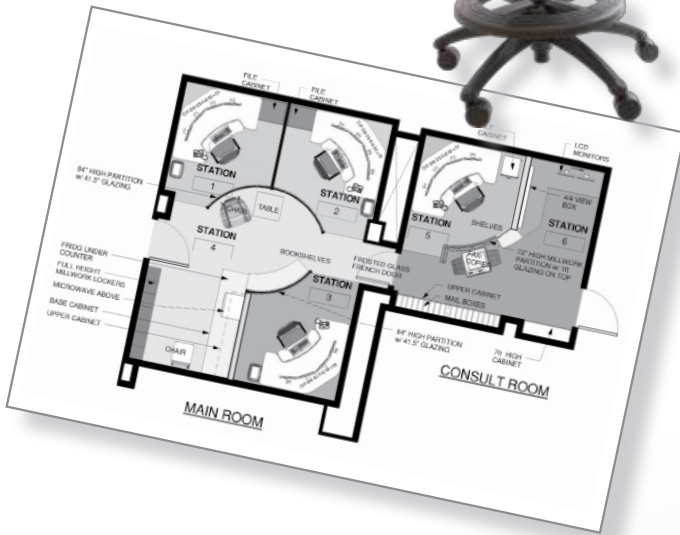

Evolve offers digital acquisition and image management technologies that improve productivity and patient care. Evolve carefully listens to the needs and goals of each client and creates a unique solution.

- CR & DR
- PACS
- PM/EMR Integration
- Training and ongoing support

Reading Room

Evolve designs work environments for Radiologists that incorporates customer specific floor planning, ergonomic workstation furniture, lighting, acoustics, and related accessories that optimize workflow, improve productivity, enhance the interpretation process, and benefit the physical well being of the Radiologist.

- Space design & floor planning
- Advanced ergonomic workstation desks & seating
- Diagnostic displays
- Input devices
- Ambient & task lighting
- Sound abatement
- Floor & ceiling solutions

Communication

Fast and effective communication is a critical component of diagnostic imaging. Evolve offers communication tools that satisfy the need for timeliness & accountability, support the role of interpreting physicians and minimizes the risk of communication errors.

- Critical Results Reporting
- ED Discordance
- Web Distribution of studies for clinical review

What Our Clients Are Saying

A NEED TO OPTIMIZE: READING ROOM

"We are very pleased to have Evolve/Redrick as a major participant in our Reading Room of the Future project. The two rooms they did for us are customized for each room's size, shape, and workstation hardware. We have found that optimizing our reading room design has resulted in increased comfort and safety and decreased stress. When combined with the ability to fine tune our lighting and with the use of sound absorbing materials and sound masking, this results in improved efficiency as well as diagnostic accuracy."

Eliot L. Siegel, MD, FACR, FSIIM

Professor and Vice Chair of Imaging Informatics at the University of Maryland School of Medicine in Baltimore

A NEED FOR IMPROVED WORKFLOW EFFICIENCY: OPENLITE BOX

"Our physicians no longer complain about not being able to access and save study images and can spend more time focusing on patient needs. The ability to import and view images from studies performed elsewhere in the country, or even outside of the country, has really improved clinical workflow.""

Cynthia Fournier, CIIP

Radiology PACS Administrator, New England Baptist Hospital
