

JetGuardPLUS® V2 Level B Coveralls

Economical, No Taping Needed, Evaluated and Preferred by FDNY

JetGuardPLUS® V2 Coveralls are made from Tessaform® material, the only material which passed all NFPA 1994, Class 3, 2001 & 2007 edition standard and they have been evaluated and are now preferred by FDNY. This affordable, single use protective suit provides an economical alternative for responders requiring chemical and biological protection. Coveralls are engineered with optional attached hood, booties and boot-flaps.

Neck-flap ensures tight fit around respirator, PAPR, or SCBA

Designed with boot-flaps so NO taping is required

JetGuardPLUS V2 is the only coverall that has attached finger loops ensuring proper glove/cuff integrity

Added zipper-flap ensures users remain safe

Special Features

- Ideal for Hazmat Teams and police
- Evaluated and purchased by the FDNY, the US Military, and pharmaceutical companies
- Economical single-use protective suit so 'bunker gear' does not need to be compromised
- Coveralls for use with negative or positive pressure respirators
- The patented Tessaform® material is the only material which passed all NFPA 1994, Class 3, 2001 & 2007 edition standards. Tessaform passed all chemical warfare agent tests required by NFPA. Tessaform is anti-static on the inside AND outside (other leading suits have only inside antistatic properties).
- Hot taped sealed seams for more protection
- Comfortable and QUIET materials
- Attached bootie protects the wearer completely from head to toe
- Designed with finger-loops so users stay safe (suits can be ordered with attached gloves)
- Designed with Boot-flap, so NO taping is needed
- Suits are vacuum sealed to minimize storage space.

10 Reason Why Hazmat Teams and Police Departments are Choosing JetGuardPLUS V2 Coveralls

- 1 TESSAFORM:** JetGuardPLUS V2 Coveralls are made with the patented Tessaform® material. This is the only material which passed all NFPA 1994: Protective Ensembles for First Responders to CBRN Terrorism Incidents, Class 3, 2007 edition AND 2001 edition standards.
- 2 CHEMICAL RESISTANT:** JetGuardPLUS® coverall material out performs (or equals) Tyvek® F material in 102 out of 109 chemicals tested (Chemical Resistance Data Available Upon Request)
- 3 HEAT LOSS:** Total Heat Loss = 200 Watts/m². This is the THL value required for certification to NFPA 1994, Class 3, 2007 edition. (NFPA 1971: Standard on Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting, 2000 Edition, requirement is 135 Watts/m²).
- 4 CHEMICAL WARFARE TESTING:** Garment material passed all Chemical Warfare agents required in NFPA 1994 – Class 3, 2007 edition [Mustard (HD), Soman (GD), Sarin (GB), Tabun (GA), VX, and Lewisite]
- 5 10 YEAR SHELF LIFE AVAILABLE:** JetGuardPLUS® V2 coveralls are available upon request in special military packaging which extends the shelf life of the coveralls from 5 years to 10 years.
- 6 ANTI-STATIC:** Garment material is anti-static on the inside AND outside. Tyvek F is Anti-Static on inside ONLY
- 7 FINGER-LOOPS:** Patented finger-loops ensure proper glove/cuff interface
- 8 BOOT-FLAPS:** Designed with Boot-flaps. No need to tape boots/coveralls
- 9 PREFERRED CHOICE:** FDNY, NYPD, The City of Baltimore, NJ State Police, N.I.H., US Military are some of the many departments wearing JetGuardPLUS garments. Note: San Jose County performed a one year intense PPE evaluation and selected JetGuardPLUS coveralls over Tyvek F Coveralls
- 10 APPROVED BY USERS:** State of California recently approved the use of JetGuardPLUS coveralls for Police, Fire Departments, Hazmat Teams, and other First Responders and First Receivers
