

JetGuardPLUS® V2 Level B Coveralls

Economical, No Taping Needed, Evaluated and Preferred by FDNY

JetGuardPLUS® V2 Coveralls are made from Tessaform® material, the only material which passed all NFPA 1994, Class 3, 2001 & 2007 edition standards. This affordable, single use protective suit provides an economical alternative to departments who typically respond in Bunker Gear. Don't compromise expensive Turnout Gear when a low cost, chemical protective suit offers better protection. Coveralls are engineered with attached hood/booties, boot-flaps and finger loops...so NO taping is required.

Neck-flap insures tight fit around respirator, PAPP, or SCBA

Designed with boot-flaps so NO taping is required

JetGuardPLUS V2 are the only coveralls that have attached finger loops insuring proper glove/cuff interface.

Added zipper-flap insures users remain safe.

Special Features

- Ideal for Hazmat Teams and police
- Evaluated and preferred by the FDNY and the US Military
- Economical single-use protective suit so 'bunker gear' does not need to be compromised
- Coveralls for use with negative or positive pressure respirators
- The patented Tessaform® material is the only material which passed all NFPA 1994, Class 3, 2001 & 2007 edition standards. Tessaform passed all chemical warfare agent tests required by NFPA. Tessaform is anti-static on the inside AND outside (other leading suits have only inside antistatic properties).
- Hot taped sealed seams for more protection
- Comfortable and QUIET materials
- Attached bootie protects the wearer completely from head to toe
- Designed with finger-loops so users stay safe (suits can be ordered with attached gloves)
- Designed with Boot-flap, so NO taping is needed
- Suits are vacuum sealed to minimize storage space.

10 Reason Why More Hazmat Teams and Police Departments are Choosing JetGuardPLUS V2 Coveralls

- 1 TESSAFORM:** JetGuardPLUS V2 Coveralls are made with the patented Tessaform® material. This is the only material which passed all NFPA 1994: Protective Ensembles for First Responders to CBRN Terrorism Incidents, Class 3, 2007 edition AND 2001 edition standards.
- 2 CHEMICAL RESISTANT:** JetGuardPLUS® coverall material out performs (or equals) Tyvek® F material in 102 out of 109 chemicals tested (Chemical Resistance Data Available Upon Request)
- 3 HEAT LOSS:** Total Heat Loss = 200 Watts/m². This is the THL value required for certification to NFPA 1994, Class 3, 2007 edition. (NFPA 1971: Standard on Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting, 2000 Edition, requirement is 135 Watts/m²).
- 4 CHEMICAL WARFARE TESTING:** Garment material passed all Chemical Warfare agents required in NFPA 1994 – Class 3, 2007 edition [Mustard (HD), Soman (GD), Sarin (GB), Tabun (GA), VX, and Lewisite]
- 5 10 YEAR SHELF LIFE AVAILABLE:** JetGuardPLUS® V2 coveralls are available upon request in special military packaging which extends the shelf life of the coveralls from 5 years to 10 years.
- 6 ANTI-STATIC:** Garment material is anti-static on the inside AND outside. Tyvek F is Anti-Static on inside ONLY
- 7 FINGER-LOOPS:** Patented finger-loops ensure proper glove/cuff interface
- 8 BOOT-FLAPS:** Designed with Boot-flaps. No need to tape boots/coveralls
- 9 PREFERRED CHOICE:** FDNY, NYPD, The City of Baltimore, NJ State Police, N.I.H., US Military are some of the many departments wearing JetGuardPLUS garments. Note: San Jose County performed a one year intense PPE evaluation and selected JetGuardPLUS coveralls over Tyvek F Coveralls
- 10 APPROVED BY USERS:** State of California recently approved the use of JetGuardPLUS coveralls for Police, Fire Departments, Hazmat Teams, and other First Responders and First Receivers
