

SRN 1000 Copper System

This simplified system is great for customers adding on to an existing system or those looking for a more economical option with less coverage. The Copper System is a great way to introduce the SRN 1000 to your department, and it's easy to add more options and coverage for future needs.

Total dimensions: 6 ½ ft. (H) X 6 Ft. (L)

The SRN 1000 Copper System Includes:

- 2 Tripods (up to 6½' in height)
- 2 Screens (each 6' in length)
- 2 Beacons
- 2 Weighted ballast bags
- 1 Mobile travel bag
- 1 Travel bag for ballast and beacons
- 2 Tethers

Product Features

- Ease of assembly by a single person in just minutes
- Light weight with expandable barrier screens
- Strong magnets, bungee cords, & weighted bags to keep the unit grounded
- Steel tethers are included to assist in grounding the system in high winds
- Stenciled names and different colors available upon request
