

Expectant Treatment Module (Model TT-ET)

Intuitively Organized and Response Friendly™

The Expectant Treatment module is designed as part of a Response-Friendly™ Triage & Treatment System. It provides the components necessary for medical staff to address victims who would not survive with optimal medical care. This Triage and Treatment module is utilized during a patient surge in the wake of a disaster. It is intuitively organized and packaged to be Response-Friendly™.

Includes:

- 2 Mobile Medical Cases
- 1 Upright Medical Organizer (UMO)
- Supported Care Functions:
 - Staff PPE
 - Post-Mortem
- SmartBook™ Operator's Manual
