

## CYALUME Chemiluminescent Light Sticks

Phthalate-Free • Reliable • Extended Shelf Life • Four-Year Warranty

### Lightstation

The Cyalume LightStation line provides emergency lighting with 4, 10, or 20, ten inch" SnapLights® that last for 4 hours. The photoluminescent label makes the LightStation instantly identifiable in the dark when the power goes out. When the front cover of the lightstation is opened, all SnapLights activate and can be easily removed to provide users with the personal lighting they need to reach safety. However, when the model 20 is opened, one SnapLight is activated to provide area lighting, leaving the remaining 19 to be activated as needed with a simple bend, snap, and shake. All LightStations can be mounted to the wall near exits, fire extinguishers, within transportation systems, or in rooms and hallways that have little or no emergency lighting. Each LightStation is sealed with pins that provide a visual alert of use or tampering.

### Special Features

#### Light Stations

- Made of fire and blast resistant steel or industrial strength plastic
- Hold 4, 10, or 20 - ten inch lightsticks called SnapLights
- Provide personal and area lighting when opened
- Instantly identifiable in the dark

## S.E.E. (Safety Evacuation Lighting System)

S.E.E.® provides light to prevent slips, trips, falls, and chaos in darkness. More dependable than flashlights, safer than candles or flares, it enables distinct marking of evacuation routes.

System Refills

## Special Features

S.E.E.

- Photoluminescent label is immediately visible
- Includes tamper-evident pin
- Each ChemLight® illuminates for two hours

### Product Application

- Install S.E.E.® every 100 feet along a designated evacuation route to provide a safe, clearly-lighted path
- Place in critical areas, i.e. near fire extinguishers, exits, stairwells, alarms, etc.
- Activate by pulling the front cover
- Remove one ChemLight® and evacuate; leave the other in place as a stationary light source for others following
