

CYALUME Personal Marker Lights

Personal Identification • Rescue-at-Sea Signal • Man-Overboard Light

PML (Personal Marker Light)

Coast Guard approved, the PML is the superior clip-on identifying signal for rescue-at-sea or evacuation operations. PML's easily attach to PFD's and immersion suits for quick identification. Designed to be lightweight, waterproof, and buoyant, the PML is the ideal emergency locator. Squeeze-handle provides immediate activation. When the protective sleeve is removed, 360° of reliable light is visible up to 1 nautical mile and up to 3 miles by air. Recommended for off-shore and workboat personnel. Available in green; providing 8 hours of illumination.

Personnel Marker Lights (PML®) are activated with a squeeze, causing the casing to slide off, revealing the activated green light stick. PMLs provide 360° illumination and come as a SOLAS, single or double version.

Dual PML has an option for warm (greater than 50F) and cold water (less than 50F)

Special Features

- 4-year shelf life, 4-year warranty
- Tamper Evident Label
- Lightweight and waterproof
- Duration varies with water temperature; Average duration is 8 hours
- Visible up to 1 nautical mile; 3 miles from altitude
- Attaches to PFDs, immersion suits & clothing
- No batteries
- Non-toxic, non-flammable, no heat emitted

Solas PML (Personal Marker Light)

The dual function, SOLAS PML is designed with a chemical and electronic light source for additional protection. The SOLAS PML securely attaches to a PFD. The electronic portion of the SOLAS PML is water activated and automatically starts flashing with a white high intensity battery operated beacon. The beacon can be manually turned on or off and will not dim. The ChemLight® is manually activated by squeezing the handle. When the protective sleeve is removed, 360° of reliable light is visible up to 1 nautical mile and up to 3 miles by air. Available in green; providing 8 hours of illumination. 4-year warranty. 5-year shelf life.

Special Features

Electronic Light Component

- Turns on automatically when submerged in water
- Provides flashing, point of light signal for over 8 hours
- High intensity white incandescent light wont dim for duration of lithium battery life
- Low battery indicator
- Light can also be manually turned on and off

Chemical Light Component

- Proven Personal Marker Light (PML) technology for over 2 decades
- Military grade chemical light is waterproof, lightweight, non-toxic and battery free
- Steady green signal illuminates area around user for 360 degrees
- Manually activated

Dual Function PFD Light

- Provides double the light technology of other PFD lights; electronic and chemical light
- SOLAS, U.S. Coast Guard and Wheelmark approved
- Visible for up to one nautical mile at sea level (three nm at altitude)

The SOLAS PML has a battery operated, water or manually activated beacon in addition to the chemical light. Electronics will shut off 30 minutes after being removed from the water

“Trusted and Used by the United States Military!”
