

# UST Tactical Flood Packs

Compact and Easily Portable • Flood Prevention • CleanUp

UST Tactical Flood Packs contain special polymers that rapidly expand on contact with water. Polymer compounds are non-toxic, non-hazardous and biodegradable. As they expand, they create a barrier and divert or block water flow. Tactical Flood Packs are made with UV stable material for long life and have multiple civil and defense uses.

Tactical Flood Packs are compact, fold to the size of a soda can, and weigh only 10 oz. (285 grams). In the presence of water, Tactical Flood Packs grow to 12" x 24" x 3.5" (thick) and will then weigh 32 lbs. (14kg). One set of 12 flood packs, builds a 12" wide x 9" high x 8 feet long (2.4m) wall that will block and divert water flow. Tactical Flood Packs can also be used to create dams, pathways before floods, and to cleanup water in buildings or roads.

## Multiple Uses

### Flood Prevention

- Build Dams
- Berms
- Flood Walls
- Barriers
- Divert Water Flow
- Create Pathways

### Water Absorbent

- Urban and Rural Water Cleanup
- Snow Melt
- Sewage

### Ground Preparation

- Search and Rescue
- Military Use

### Erosion Control

- Construction Sites
- Mitigate Run-off
- Road and Highway Development

## Special Features

- Compact - **Folds to size of a Soda Can** and weighs only 10 ounces
- Easily transport hundreds or thousands of Tactical Flood Packs
- Tactical Flood Packs are reusable
- Multi-use
- NO sand
- Non-Toxic, non-hazardous, biodegradable polymer fill
- Low cost - minimal labor needed
- Made in the USA

## The benefits of switching from sand bags to UST Tactical Flood Packs

- Reduce Costs
- Force Multiplier for flood prevention – Drastically reduces the number of personnel
- Reduction in logistics and number of vehicles required for emergency flood control, water management or damage cleanup

### Tactical Flood Packs

### Sand Bags

Compact .....	Bulky
Lightweight: 10 ounces (285 grams) .....	Heavy: > 25 pounds (> 12 Kilos)
Ready to Use.....	Must fill and transport bags
LOW COST. No sand. Minimal labor needed.....	HIGH INPUT COSTS (Sand + Labor, time, vehicles, fuel, pollution and logistics)
Effortless and quick to deploy.....	Timely, difficult setup
One person can build a flood wall or pathway .....	Requires multiple people to assemble flood wall
No safety risks since no filling is required.....	Safety risks associated with filling and deployment
Easy to transport, hundreds or thousands at a time .....	Difficult to transport....only few at a time
Undeployed: 15" x 26" x 0.25", 10 ounces (285 Gm).....	Filled bags are the same size deployed or undeployed
Deployed: 12 " x 24" x 3.5", 32 pounds (14 kg)	
Multiple lengths available: 12", 24", 36", 48"
