Dangerous Problem... **SOLVED!**

Have you been buying the same old **HAZARDOUS** and **FLAMMABLE** flares forever?

Did you know that traditional flares are **DANGEROUS** and **UNUSABLE** in certain situations?

CYALUME
Light Technology

SOLVES THE PROBLEM!

- 2 Year shelf life
- No more burned skin or clothing
- No more concern of ground water contamination
- No more concern of flammable liquid igniting at an accident scene
- No more flare activation issues
- No special HazMat handling or storing requirements

Average shelf life of Cyalume flare alternative is twice as long as traditional flares.

Cyalume flare alternative is non-toxic, non-flammable, and activation in any precipitation is GUARANTEED!
