

Med Sled Pediatric Evacuation

Safe Pediatric Evacuation • Multiple Patient Evacuation at One Time

Pediatric patients require padded and secure surfaces and often need essential life-saving equipment during evacuation. Pediatric Inserts fit inside of the MS36 and MS48 Med Sled models to provide a safe and comfortable method for evacuating your most delicate patients. Medsled is safe to use down stairwells and utilizes a tethered braking device for a controlled and smooth descent.

#INF3

Infant Sled Insert
0-5 Months Old
Holds up to 3 Infants
and Equipment

#TOD1

Toddler Sled Insert
